

CORPORATE PROFILE SHORT

Pellucid Networks is a developer of technology and applications that allow for the secure and rapid delivery of high fidelity medical images over disparate bandwidth. Headquartered in Singapore, the company's R&D and operations are managed out of Chennai, India.

CORPORATE PROFILE

Pellucid, with offices in Singapore and India is a developer of high performance tele- diagnostics network systems and enterprise healthcare solutions. Setup by a group of highly experienced healthcare informatics professionals, our network enables clinical services to reach the remote rural areas of any geography, including those plagued by unreliable telecommunication infrastructure. Through Pellucid's proprietary network and state of the art solutions, medical images – such as MRI, CT, X-rays, pathology and dermatology data – can be swiftly and securely shared with radiologists, and other specialists, in any part of the world.

PRODUCT PROFILE SHORT

Pellucid delivers medical imaging technology through cloud computing that breaks common barriers and challenges: High Upfront Costs, Revenue Growth and Productivity. Our simple yet meaningful application is available 'On Demand' for every stakeholder, including enterprise level requirements. Our 'pay as you go' model gives you the freedom to use the application at any location and time, with minimal infrastructure investment.

PRODUCT PROFILE

Pellucid delivers medical imaging technology through cloud computing that breaks through common barriers and challenges: High Upfront Costs, Revenue Growth and Productivity. Our simple yet meaningful application is available 'On Demand' for every stakeholder including enterprise level requirements. Our 'Pay as you Go' model, with plans for both imaging centres and radiologists, gives you the freedom to use the application at any location and time, with minimal infrastructure investment. **RadLive**, Pellucid's flagship platform for simplifying radiology workflow, allows medical images, such as MRI, CT, X-rays and pathology and dermatology data, to be swiftly and securely shared with radiologists and other specialists.

Pellucid is constantly innovating to enhance the RadLive experience and improve accessibility to the RadLive platform. Recent innovations include **RadLive Go!**, the world's first diagnostic workstation and viewer on a USB drive. **RadLive Terranova** is a secure, high redundancy mini-PACS solution with compact 1-terabyte storage that is seamlessly integrated with the RadLive platform. **iRay** is a cost effective table top alternative to expensive X-ray digitizers, with diagnostic quality acquisition, an advanced DICOM viewer and full PACS integration capabilities. **RadLive Unplugged** is a collection of plugins that can instantly improve the functionality of common applications such as ClearCanvas and Microsoft Word.

INDIVIDUAL PRODUCTS/SOLUTIONS TAGLINE (KEY MESSAGE AND ESSENCE)

1. RadLive Platform: Transforming your world of healthcare imaging
2. RadLive Telerad: Next generation teleradiology on the cloud
3. RadLive Go!: Your radiology world on a USB drive
4. RadLive Terranova: PACS and storage made affordable. With teleradiology.
5. RadLive RIS PACS: Comprehensive radiology workflow integration
6. RadLive Unplugged: Smart intuitive plugins for your favourite applications
7. iRay: Wish your X-ray could go digital?

INDIVIDUAL PRODUCTS/SOLUTIONS SHORT DESCRIPTION

1. **RadLive Platform:**
RadLive takes radiology to the cloud, combining the benefits of a cutting edge image diagnosis platform, with security, standards compliance & interoperability. The RadLive platform provides radiologists, referring physicians, and patients with seamless and real time access to diagnostic images and reports, at the click of a button.
2. **RadLive Telerad:**
Our teleradiology platform is accessible on a 'pay as you go' model, with plans for both imaging centres and radiologists. RadLive Telerad gives you the benefit to tap into an advanced workflow solution, at any location and time, with minimal infrastructure investment.
3. **RadLive Go!:**
Experience the RadLive platform with true mobility and security, with the world's first diagnostic workstation and viewer for radiology on a USB drive
4. **RadLive Terranova:**
RadLive Terranova is a secure, high redundancy mini-PACS solution with compact 1-terabyte storage that is seamlessly integrated with the RadLive platform. Available on a 'pay as you go' model.
5. **RadLive RIS PACS:**
RadLive RIS PACS is an enterprise solution that comprehensively integrates an imaging centre's workflow, including front desk, billing, scheduling, patient registration, referral physician access, teleradiology and PACS.
6. **RadLive Unplugged:**
RadLive Unplugged is a collection of simple, one time and affordable downloads that instantly improve the functionality of common applications used by radiologists such as ClearCanvas and Microsoft Word.
7. **iRay:**
iRay is a cost effective table top alternative to expensive X-ray digitizers, with diagnostic quality acquisition, an advanced DICOM viewer and full PACS integration capabilities.
