

*RadLive is the next generation diagnostic imaging platform on the cloud.*

*RadLive takes radiology to the cloud, combining the benefits of a cutting edge image diagnosis platform, with security, standards compliance & interoperability.*

*The RadLive platform provides radiologists, referring physicians, and patients with seamless and real time access to diagnostic images and reports, at the click of a button.*

### **Our Clients Speak**

*Pellucid has enabled me to focus on my core business of radiology reporting. I like the operations support and the ease of use.*

*Dr Varaprasad, founder-radiologist at Ojasvi Teleradiology Services*

*Pellucid Networks is a developer of technology and applications that facilitate the secure and rapid delivery of high fidelity medical images over disparate bandwidth.*

*Headquartered in Singapore, the company's R&D and operations are managed out of Chennai, India.*

### **RadLive Platform Highlights**

- Minimal capital expenditure
- Pay as you go
- Minimal software installation
- Anytime, anywhere access
- Instant start and scalable

### **Platform Additional Options**

- **Command Centre**  
*Centralised workflow and control. Automatically assign cases to radiologists from a single window*
- **RadLive GO!**  
*World's first diagnostic workstation on a USB drive. Report securely and access the RadLive platform from any location & PC*
- **RadLive Terranova**  
*Secure, high redundancy mini-PACS solution with compact 1-terabyte storage. Seamlessly integrated with the RadLive platform*
- **RadLive RIS PACS**  
*Enterprise solution that comprehensively integrates your centre's workflow, including front desk, billing, scheduling, patient registration, referral physician access, teleradiology and PACS*

# PELLUCID

*Diagnosis Simplified*

Carry your radiology world with you!

The cutting edge RadLive platform provides radiologists, referring physicians and patients with seamless, real time access to diagnostic images and reports with just the click of a button.

Now, for the first time, access the RadLive platform and your entire workstation from a USB drive!

### RadLive Go! Highlights

- Anytime, anywhere, any PC  
Currently, DICOM workstations cannot be moved from their installed base causing inconvenience to specialists. With RadLive Go! you can now carry a full DICOM workstation on a secure authenticated and portable USB drive and report from any PC!
- Personal Workstation  
Dedicated, personal workstation to store and comment on cases of academic interest and share presentations with peers
- PACS in a Box  
Simple solution for storing and retrieving DICOM images for small imaging groups and centres

### Other Features

- Seamless DICOM integration with existing modalities
- Embedded reporting using predefined templates
- Retrieve patient reports based on ICD 10 codes
- Zero install time
- Remote support capabilities
